

WHY ORTHONOVIS CWM-COLLAGEN WOUND MATRIX?

Orthonovis CWM-Collagen Wound Matrix is a sterile, conformable and porous wound dressing made of reconstituted type I collagen. As an FDA 510(k) cleared product, OrthoNovis CWM is a versatile collagen matrix that allows application across a wide clinical spectrum.

STABILIZED COLLAGEN

Prevents premature digestion in the wound bed.

WOUND VAC COMPATIBLE

Collagen wound matrix provides a combination of permeability and strength.

HYDROPHILIC SCAFFOLD

Allows for rapid absorption resulting in a conformable product for the wound.

POROUS MATRIX

Enables optimal host cell infiltration.

POTENTIAL APPLICATIONS

- + ABRASIONS
- + LACERATIONS
- + SKIN TEARS
- + GRAFT/DONOR SITES
- + SURGICAL INCISIONS
- + PARTIAL & FULL THICKNESS WOUNDS
- + PRESSURE SORES/ULCERS
